Current Status of the Australian Financial Services Industry

The Australian Financial Planning industry is undergoing a period of extraordinary change. Escalating regulatory oversight, mandated Federal Government reductions and/or elimination of commissions and rising operating costs are reducing profit margins across the industry. Independent research by Australian online Think Tank www.riskinfo.com.au in July 2015 indicates that up to 38% of risk advisors may leave the industry as a consequence the continued industry upheaval & proposed regulatory change. There is unprecedented demand for operational cost reductions, productivity improvement & margin expansion.

ABOUT INTIGER

Intiger is the first combined Software Development House and Offshore Processing Platform dedicated to the \$182bn Australian Financial Services industry. Intiger's initial focus has been within the Financial Planning sector, which consists of approximately 18,000 Financial Planning Practices in Australia and has experienced an annualised growth rate of 2.5% over the last 5 years. Intiger has successfully created the first software to digitise & automate core components of the Financial Planning process including the production of automated Statements of Advice. The production of a Statement of Advice by conventional industry methodologies is costly, time consuming & has a high risk of human processing error. The financial benefits of the proprietary Intiger software are described in detail later in this release under the title **Key Data Points of the Intiger Product Offering.**

In addition, Intiger has secured first mover advantage providing Offshore Processing Solutions exclusively to the Financial Planning sector. Intiger operates two secure outsourcing facilities in India and the Philippines employing over 53 Australian trained staff. Both operations are overseen and managed by RG146 Certified Paraplanners and experienced Australian Financial Planning professionals. When fully implemented, Intiger is expected to contractually guarantee to <u>cut the operating costs of Australian Financial Planning Practices by 40%</u>.

Intiger and 'The Deming Suite'

After three years of industry consultation, global research, software development and a successful national soft rollout, Intiger formally announced the release of '*The Deming Suite*' solution to the Australian Financial Services industry in 2015.

The Deming Suite consists of two cloud based software platforms and the industry's first cross licensee Offshore Processing facility based in Manila and India. The Deming Suite, when fully implemented, is expected to contractually guarantee to cut operating costs of Australian Financial Planning Practices by 40%.

Software 1 (LiLLY)

'LILLY' is industry first proprietary software that seeks to simultaneously digitise and automate each core process within the Financial Planning lifecycle.

Digitisation:

LiLLY's digitisation eliminates nearly all manual paper based processing to fundamentally improve back office operational efficiency whilst simultaneously reducing the cost per unit of financial advice. It also delivers the process standardisation the industry and their governing body seeks and resolves the significant data protection, accuracy and integrity risks long associated with the industries current antiquated manual and paper based approach.

LiLLY's standardisation improves per practice efficiency facilitating each firm's capacity for rapid, controlled, compliant and scalable growth under expanding margins.

Automation:

Leveraging industry first proprietary algorithms, LiLLY delivers a potential industry first personalised automated Statement of Advice.

LILLY is not Robo-Advice

LiLLY's founders have first-hand commercial experience in the growth of the Robo-Advice market across the USA & Europe. LiLLY has been crafted to specifically address the limitations of the Robo-Advice model i.e. 'bucket based', one size fits all standardised advice, devoid of personalisation and the elimination of the high value client/advisor relationship from the financial advice process.

LiLLY retains the low cost, automated, on demand advantages of Robo-Advice but simultaneously delivers an exceptional, unlimited level of personalisation. Where Robo-Advice devalues/seeks to

eliminate the relationship between the client and advisor, LiLLY takes the opposite approach. LiLLY embraces the role of the advisor, recognising the unique value add (especially in respect of high net worth clients) and works for them to eliminate all low/no value add tasks from their role, inclusive of automating the costly, time consuming production of Statements of Advice. Intiger believes that its partnership approach will significantly enhance the potential for rapid, near-term customer adoption of its solution as it provides substantial savings for advisors and superannuates.

Software 2 (KLIP)

'KLIP' arguably represents the most significant advancement in the management of Financial Planning practices by CEOs or Licensees the industry has seen since deregulation. A world class, cloud based Business Process Management Platform that delivers unique, real time statistical/data based control over the performance of a single or group of practices, inclusive of each individual process and the human resource within them.

An example of the KLIP software in practice is shown below with further examples illustrated in Annexure A.

PROPOSED MANAGEMENT

Mr Mark Fisher

Mark is the Founder and Proprietor of Intiger.

For the last twenty (20) years Mark has worked globally in a range of Senior Executive roles for some of the worlds most respected Tier 1 investment, retail and commercial banking and Management Consulting firms, including Goldman Sachs, Lloyds of London, JP Morgan, HSBC Capital Markets, Bank of China, GE Capital, Barclays Capital Investment Bank & Barclays International Retail & Commercial.

Specialising in large scale global change programs, offshore processing, cost reduction strategies and institutional restructuring, Mark has lived and worked in a variety of global locations including the US, UK, Switzerland, Nigeria, Spain, France, Portugal, Italy, France, Ecuador, Colombia, India, Philippines, Latvia, Romania, Poland and Hungary.

In 1999 Mark was Program Director under Jack Welch at GE Capital USA at a time Mr Welch made the first attempt by any Western commercial institution to transfer white good/administrative processes offshore. As recent Head of Strategy & Change for the Royal Bank of Scotland SS&P Mark oversaw its first foray into Offshore Back Office Processing in India and Hungary.

Mr Fisher recently confirmed Intiger's strategy to be:

"The number one provider of Technology and Offshore Processing solutions driving the profitability of the Australian Financial Services industry."

Referring to the proposed transaction Mr Fisher has commented:

"We embraced this transaction, one exclusively reliant on our ability to meet the financial returns our shareholders require because we are highly confident in our ability to deliver.

Delivering a solution that puts cost effective professional Financial Advice within the reach of every Australian for the first time is as much an opportunity as it is a responsibility''.

Mr Patrick Canion

Patrick will join Star Striker as a Non-Executive Director.

Patrick has over 30 years in Financial Services and is nationally recognised in the media and financial services for his leadership and innovation in financial planning. He is a Certified Financial Planner, and holds a Master of Applied Finance and Investment degree. He is a Graduate member of the Australian Institute of Company Directors. Patrick is a former member-elected director of the Financial Planning Association, past-President of the Western Australian Club and current director/trustee of the Future 2 Foundation.

Patrick is Chief Executive Officer and co-owner of ipac Western Australia, one of WA's largest and most awarded financial advice firms.

"In the last 5 years financial advisers have dealt with a mountain of additional legislation and compliance as we grow our industry into a recognised profession. Every financial adviser welcomes the reassurance this increased professionalism brings our clients, but the cost to provide this and the time it takes, at least, subtracts from the time they can spend with clients, and at worst, threatens their very viability.

However, most clients rely on friends and family, not professional financial planners, for information on financial matters and planning. Four in 10 (41%) of Australian consumers rely on friends and family, while another 30% rely on websites for financial information. Fewer Australians (23%) turn to a financial

planner. The opportunity to support financial planning professionals to improve their business efficiencies in a way that enhances their bespoke adviser/client relationship is very large."²

Commenting on the proposed acquisition, Chairman of Star Striker Mr Mathew Walker said:

"This is a transaction both ourselves and our counter-party can be very proud of. It is exciting to be in business with a vendor who has the confidence in his own business to accept consideration that is exclusively dependent on financial and operational performance. And the performance milestones are real and significant. How refreshing to have an emerging technology business talk of net profit after tax. We believe this is the first transaction of this nature on the Australian Securities Exchange and in this respect we are proud to be pioneers."
